Set a reminder to breathe deep

How to take this break
Set a reminder/chime on your computer or phone. When the reminder sounds, stop what you are doing, sit still for two minutes and focus on your breathing. Focus on the words 'breathe in' and 'breathe out' to reduce other thoughts going through your mind. Arrange another reminder to sound after the two minutes.

Why this counts - Relaxing
Deep breathing is one of the best ways to lower stress in the body because when you breathe deeply it sends a message to your brain to calm down and relax.
